ELSEVIER

Journal of Alloys and Compounds 253–254 (1997) 709–723

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volumes 253–254

AB_2
structural- and hydriding-properties of the $Zr(V_{0.25}Ni_{0.75})_\alpha$ ($1 \leq \alpha \leq 4$) alloy system 587
AB_5
function of cobalt in AB_5H_x electrodes 579
effects of the materials processing on the hydrogen absorption properties of $MmNi_5$ type alloys 621
relationship between composition, volume expansion and cyclic stability of AB_5-type metalhydride electrodes 626
AB_5 alloy Co content
the influence of Co and various additives on the performance of $MmNi_{4.3-x}Mn_{0.33}Al_{0.4}Co_x$ hydrogen storage alloys and Ni/MH prismatic sealed cells 642
AB_5 alloys
development of AB_5 type hydrogen storage alloys with low Co content for rechargeable Ni–MH batteries with respect to electric vehicle applications 570
Ab initio calculations
electronic structure investigation of the A_2PtH_4 hydrides (A = Na, K) containing $[PtH_4]$ complexes 326
internal pressure effect in the series of perovskite structure hydrides: $APdH_3$ (A = Sr,Eu,Yb) 330
AB_2 laves phase
surface properties of the fluorinated La-incorporated Ti/Zr-based AB_2 laves phase alloys 452
Absorption kinetics
kinetics of water vapour absorption on evaporated iron and titanium films 560
Absorption rate
experimental analysis and modelling of the hydriding kinetics of Ni-doped and pure Mg 550
AB_5-type alloys
thermodynamic and structural changes of various intermetallic compounds during extended cycling in closed systems 692
AB_5-type hydrides
in situ neutron diffraction study of solid gas desorption of non-stoichiometric AB_5 type hydrides 295
AC excitation
hydrogen permeability and diffusivity in amorphous Metglas 2826MB under AC excitation 370
Activation
electrochemical performances of ZrM_2 (M = V, Cr, Mn, Ni) Laves phases and the relation to microstructures and thermodynamical properties 564
new activation process for Zr-Ti-Cr-Mn-V-Ni alloy electrodes: The hot-charging treatment 652
Activation condition
hydrogenation characteristics of $TiFe_{1-x}Pd_x$ ($0.05 \leq x \leq 0.30$) alloys 238
Al effect on the (+) electrode
the influence of Co and various additives on the performance of $MmNi_{4.3-x}Mn_{0.33}Al_{0.4}Co_x$ hydrogen storage alloys and Ni/MH prismatic sealed cells 642
Alkali metal aluminium hydrides
Ti-doped alkali metal aluminium hydrides as potential novel reversible hydrogen storage materials 1
Alkaline earth hydride
orthorhombic $Ba_6Mg_7H_{26}$: a new fluoride-related ternary alkaline earth hydride 17
Alloy design
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
Alloys
calorimetric study of hydrogen interaction with $LaNi_{3.92}Al_{0.98}$ 210
gas atomized powders of hydride-forming alloys and their application in rechargeable batteries 594
Aluminum
hydrogen in aluminum 260
Amorphization
hydrogen-induced amorphization of YNi_2 enhanced by mechanical grinding 110
Amorphous
hydriding properties of a nano-/amorphous-structured Mg–Ni–H system 94
hydrogen-induced resistivity increase in amorphous and metastable crystalline (Fe,Co,Ni)–Zr ribbons 98
hydrogen-induced amorphization of C15 Laves $TbFe_2$ compound 106
Amorphous alloy
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
high temperature ^1H spin–spin relaxation in Zr–Ni–Cu–H amorphous alloys 428
Amorphous Metglas 2826MB
hydrogen permeability and diffusivity in amorphous Metglas 2826MB under AC excitation 370
Amorphous $Ni_{56}Dy_{44}$
structure of hydrogenated amorphous $Ni_{56}Dy_{44}$ 118
Anelasticity
hydrogen and oxygen motion in yttrium by anelastic relaxation measurements 367
Anelastic Relaxation
hopping and tunnelling of H(D) in semiconductors 356
hopping rates of H(D) bound to heavy interstitials in Ta as investigated by mechanical spectroscopy at MHz frequencies 374
Automotive catalyst
hydride-based cold-start heater for automotive catalyst 686

Elsevier Science S.A.

Barium magnesium hydride
orthorhombic $Ba_6Mg_7H_{26}$: a new fluoride-related ternary alkaline earth hydride 17
Batteries
nanocrystalline hydrogen storage alloys for rechargeable batteries 87
XPS and transmission electron microscopy of the multicomponent hydride-forming alloys for electrochemical applications 488
b.c.c. Ti–Nb alloys
hydrogen influence on plastic deformation mechanism of β-titanium alloys of Ti–Nb system 144
Borides
further studies of hydrogenation, disproportionation, desorption and recombination processes in a $Nd_5Fe_2B_6$ boride 134

C14 crystal structure
correlation between crystal structure and electrochemical properties of C14 Laves-phase alloys 609
C14 phase
powder X-ray diffraction under a high-pressure hydrogen atmosphere for Zr–Cr based Laves phase alloys 268
C-15 Laves phases
incoherent inelastic neutron scattering from the C-15 Laves phase $ZrTi_2H_{3.6}$ 248
C15 phase
powder X-ray diffraction under a high-pressure hydrogen atmosphere for Zr–Cr based Laves phase alloys 268
Calorimetry
calorimetric study of hydrogen interaction with $LaNi_{3.92}Al_{0.98}$ 210
CANDU
hydrogen solubility limits in α- and β-zirconium 162
hydrogen diffusion in oxides formed on surfaces of zirconium alloys 471
$CaNi_5$
alloying effect on the electronic structures of hydrogen storage compounds 322
Capture
the interaction of oxygen (nitrogen) with hydrogen in Ti, V and Ta 275
Carbohydride
synthesis of novel compounds by hydrogen combustion 10
Carbon oxide
a pressure–temperature swing process for the methanation of carbon oxides using fluorinated hydriding alloys 668
Catalysis
effects of catalyst poisons on UPD and OPD H coverage at H_2-evolving cathodes in relation to H sorption into metals 475
a tubular reactor for continuous hydrogenation of oleic acid under moderate conditions using a thin hydride layer of hydrogen storage alloy $LaNi_{4.8}Cu_{0.2}$ as catalyst 689
Cathodes
effects of catalyst poisons on UPD and OPD H coverage at H_2-evolving cathodes in relation to H sorption into metals 475
Cells
nanocrystalline hydrogen storage alloys for rechargeable batteries 87
Cell volume expansion
powder X-ray diffraction under a high-pressure hydrogen atmosphere for Zr–Cr based Laves phase alloys 268
Chemical equilibrium
thermodynamic theory of magnetic field effects on chemical equilibria and applications to metal–hydrogen systems 191
Chemisorption
effects of catalyst poisons on UPD and OPD H coverage at H_2-evolving cathodes in relation to H sorption into metals 475
Cluster ions
hydrogen (deuterium) bonding properties in ZrV_2D_x studied by SIMS and SNMS 463
Cobalt
hydrogen transport parameters for a cobalt based alloy 381
Cobalt alloy
hydrogen transport parameters for a cobalt based alloy 381
Combustion
synthesis of novel compounds by hydrogen combustion 10
Composites
characterization and hydriding properties of Mg-graphite composites prepared by mechanical grinding as new hydrogen storage materials 34
Compton-suppression and pair spectrometers
hydrogen detection by prompt gamma-ray activation analysis (PGAA) 156
Computer simulation
investigation of interaction of hydrogen with solute atoms by means of internal friction and diffusion data 364
Conducting materials
metal hydride electrodes with lamellar-type network structure 665
Contamination
hydrogen absorption of $LaNi_5$ powders precovered with O_2, CO, H_2S, CO_2 or N_2 511
Cooperative hydriding phenomena
cooperative hydriding properties in a nanostructured Mg_2Ni–H system 80
Corrosion
microstructural characterisation of surface layers of ZrM_2 powders (Laves phases) obtained by various corrosion treatments 492
Corrosion resistance
investigation of AB_5 type hydrogen storage alloy corrosion behavior in alkaline electrolyte solutions 660
Crack
new activation process for Zr-Ti-Cr-Mn-V-Ni alloy electrodes: The hot-charging treatment 652
Crystal structure
orthorhombic $Ba_6Mg_7H_{26}$: a new fluoride-related ternary alkaline earth hydride 17
neutron spectroscopy of localized modes in $CeD_{2-x}H_y$ 252
neutron diffraction study of atomic bonding properties in the hydrogen-absorbing $Zr(Al_xFe_{1-x})_2$ system 265
neutron powder diffraction investigations of pure and deuterated $Ti_3PO_{0.58}$ 279
about hydrogen insertion in $ThMn_{12}$ type alloys 298
study of the system $Zr_{1-x}Ti_x(Cr_{0.5}M_{0.4}V_{0.1})_2 - H_2$ ($0 \leq x \leq 0.2$, M = Fe, Co, Ni) 302
synthesis and crystal structure of tetragonal $LnMg_2H_7$ (Ln = La, Ce), two Laves phase hydride derivatives having ordered hydrogen distribution 313
Crystal structures
the hydride fluoride crystal structure database, HFD 286
Cycle life
development of AB_5 type hydrogen storage alloys with low Co content for rechargeable Ni–MH batteries with respect to electric vehicle applications 570
the influence of Co and various additives on the performance of $MmNi_{4.3-x}Mn_{0.33}Al_{0.4}Co_x$ hydrogen storage alloys and Ni/MH prismatic sealed cells 642

Cyclic stability
thermodynamic and structural changes of various intermetallic compounds during extended cycling in closed systems 692
Cyclic voltammetry
hydrogen adsorption of metal nickel and hydrogen storage alloy electrodes 515
Cycling
influence of expansion of metal hydride during hydriding–dehydriding cycles 682

Data base
the hydride fluoride crystal structure database, HFD 286
Dead layers
metallic superlattices: quasi two-dimensional playground for hydrogen 51
Debye–Waller factor
neutron diffraction study of atomic bonding properties in the hydrogen-absorbing $Zr(Al_xFe_{1-x})_2$ system 265
Degradation
the hydrogenation characteristics of Ti-Zr-V-Mn-Ni C14 type Laves phase alloys for metal hydride electrodes 601
thermodynamic and structural changes of various intermetallic compounds during extended cycling in closed systems 692
Desorption
desorption characteristics of rare earth (R) hydrides (R = Y, Ce, Pr, Nd, Sm, Gd and Tb) in relation to the HDDR behaviour of R–Fe-based-compounds 128
Desorption spectrum
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
Deuterides
structural and magnetic study of new YFe_2D_x compounds ($0 < x \leq 3.5$) 272
neutron diffraction study of $HoFe_{11}TiD_x$ deuterides 318
hydrogen absorption–desorption, crystal structure and magnetism in RENiAl intermetallic compounds and their hydrides 343
Deuterium
deuterium absorption in $Pd_{0.9}Y_{0.1}$ alloy 175
deformations induced by high loading ratios in palladium–deuterium compounds 181
material characteristics and behaviour of highly deuterium loaded palladium by electrolysis 185
neutron scattering studies of the structure and dynamics of rare-earth hydrides and deuterides 241
experimental study of electrochemical deuterium loading of Pd cathodes in the $LiOD/D_2O$ system 617
Diffusion
investigation of interaction of hydrogen with solute atoms by means of internal friction and diffusion data 364
an investigation of hydrogen diffusion in nanocrystalline Pd by neutron spectroscopy 393
characterising materials for walls of fusion reactors 397
muonium states and dynamics as a model for hydrogen in semiconductors 414
localized motion of hydrogen in C15-type TaV_2: nuclear magnetic resonance and neutron scattering study 432
hydrogen diffusion in oxides formed on surfaces of zirconium alloys 471
an impedance model for electrode processes in metal hydride electrodes 656
Diffusional relaxation
Mössbauer experiments with ^{57}Fe and ^{57}Co in palladium hydride: Diffusional relaxation and high hydrogen concentrations 353
Discharge capacity
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500
vanadium-based solid solution alloys with three-dimensional network structure for high capacity metal hydride electrodes 583
the hydrogenation characteristics of Ti-Zr-V-Mn-Ni C14 type Laves phase alloys for metal hydride electrodes 601
Dislocation
trapped muon in heavily dislocated palladium 420
Dislocations
hydrogen and oxygen motion in yttrium by anelastic relaxation measurements 367
Disorder
nanocrystalline metal hydrides 70
Disordered metal hydrides
muon spin relaxation in niobium-hydrogen 423
Disproportionation
thermodynamic and structural changes of various intermetallic compounds during extended cycling in closed systems 692
Durability
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500
$Dy_6Fe_{23}H_x$
high field magnetization of metal hydrides under hydrogen pressure 350

Elastic and elasto-plastic accommodation energies
hysteresis in metal–hydrogen systems 203
Elastic properties
reorientation of the Ce–D pairs in a $Pd_{95}Ce_5D_n$ alloy 360
Electrical resistivity
observation of the β–δ phase transformation in deuterated iodide titanium films by electrical resistance measurements 158
Electric properties
yttrium and lanthanum hydride films with switchable optical properties 44
Electroadsorption
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
Electrochemical hydride properties
hydriding behavior of gas-atomized AB_5 alloys 613
Electrochemical impedance
hydrogen adsorption of metal nickel and hydrogen storage alloy electrodes 515
Electrochemical loading
the decomposition of electrochemically loaded palladium hydride: a thermal analysis study 207
Electrochemical properties
studies on the properties and characteristics of the fluorinated AB_5 hydrogen-absorbing electrode alloys 520
preparation and electrochemical properties of unidirectionally solidified $Ml(NiCoMnTi)_5$ alloys 590
Electrochemistry
hydrogen in nanocrystalline palladium 84
Electrode
structural- and hydriding-properties of the $Zr(V_{0.25}Ni_{0.75})_\alpha$ ($1 \leq \alpha \leq 4$) alloy system 587

electrochemical activity enhancement of a $LaNi_{4.7}Al_{0.3}$ electrode treated with an alkaline solution containing H_2O_2 598
the hydrogenation characteristics of Ti-Zr-V-Mn-Ni C14 type Laves phase alloys for metal hydride electrodes 601
relationship between composition, volume expansion and cyclic stability of AB_5-type metalhydride electrodes 626
investigation of AB_5 type hydrogen storage alloy corrosion behavior in alkaline electrolyte solutions 660
Electrode characteristics
electrode characteristics of metal hydride electrodes prepared by mechanical alloying 605
Electrodes
nanocrystalline hydrogen storage alloys for rechargeable batteries 87
Electrolytical hydrogenation
hydrogen-induced resistivity increase in amorphous and metastable crystalline (Fe,Co,Ni)–Zr ribbons 98
Electromigration
correlation of mass dependence between heat of transport and effective charge of hydrogen isotopes in V, Nb and Ta 401
Electron emission
electron emission at the surface of metal tritide films 62
Electron propagation
electron emission at the surface of metal tritide films 62
Electronic structure
alloying effect on the electronic structures of hydrogen storage compounds 322
electronic structure investigation of the A_2PtH_4 hydrides (A = Na, K) containing $[PtH_4]$ complexes 326
internal pressure effect in the series of perovskite structure hydrides: $APdH_3$ (A = Sr,Eu,Yb) 330
Embrittlement
hydrogen in the martensitic DIN 1.4914: a review 152
Environmental issue
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
Epitaxy
thickness dependence of the hydrogen solubility in epitaxial Nb(110) films grown on Al_2O_3(11.0) substrates 58
Equilibrium constant
thermodynamic theory of magnetic field effects on chemical equilibria and applications to metal–hydrogen systems 191
Equilibrium electrode potential
thermodynamic theory of magnetic field effects on chemical equilibria and applications to metal–hydrogen systems 191
Eutectic microstructure
hydrogen diffusion in multi-phase LaNiFe alloys 390
Expansion
influence of expansion of metal hydride during hydriding–dehydriding cycles 682

Fe
kinetics of water vapour absorption on evaporated iron and titanium films 560
Fe atoms
neutron diffraction study of $HoFe_{11}TiD_x$ deuterides 318
Ferromagnet
magnetic properties of the $LaNi_5$–H system 336
FeTi
analysis of FeTi hydride alloys by thermal analysis, small angle neutron scattering and positron annihilation 195
Finite element method
hysteresis in metal–hydrogen systems 203
Flake copper powder
metal hydride electrodes with lamellar-type network structure 665
Flake nickel powder
metal hydride electrodes with lamellar-type network structure 665
Fluoride
a pressure–temperature swing process for the methanation of carbon oxides using fluorinated hydriding alloys 668
Fluorides
the hydride fluoride crystal structure database, HFD 286
Fluorinated hydriding alloy
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500
Fluorinated metal hydride
studies on the properties and characteristics of the fluorinated AB_5 hydrogen-absorbing electrode alloys 520
Fluorination
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500
Fluorination mechanism
studies on the properties and characteristics of the fluorinated AB_5 hydrogen-absorbing electrode alloys 520
Fluorination procedure
surface properties of the fluorinated La-incorporated Ti/Zr-based AB_2 laves phase alloys 452
Fluorination reaction
studies on the properties and characteristics of the fluorinated AB_5 hydrogen-absorbing electrode alloys 520
Fullerenes
hydrogenation of fullerenes C_{60} and C_{70} in the presence of hydride-forming metals and intermetallic compounds 25
Full-hemispherical photoelectron diffraction
the influence of hydrogen on the growth of yttrium on Ni(001) and Ni(110) 467
Functionally graded surface layer
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500

Gadolinium
the effect of hydrogen uptake on the Hall resistivity and the electrical resistivity of gadolinium films 333
Gadolinium hydride
the effect of hydrogen uptake on the Hall resistivity and the electrical resistivity of gadolinium films 333
Gas atomisation
development of AB_5 type hydrogen storage alloys with low Co content for rechargeable Ni–MH batteries with respect to electric vehicle applications 570
Gas atomization
hydriding behavior of gas-atomized AB_5 alloys 613
$GdFe_3H_x$
high field magnetization of metal hydrides under hydrogen pressure 350
Grain size
nanocrystalline metal hydrides 70
influence of expansion of metal hydride during hydriding–dehydriding cycles 682
Group V metals
correlation of mass dependence between heat of transport and effective charge of hydrogen isotopes in V, Nb and Ta 401

Growth
the influence of hydrogen on the growth of yttrium on Ni(001) and Ni(110) 467
kinetics and mechanisms of metal hydrides formation—a review 529

Hall resistivity
the effect of hydrogen uptake on the Hall resistivity and the electrical resistivity of gadolinium films 333
H(D) Hopping and Tunnelling
hopping and tunnelling of H(D) in semiconductors 356
HDDR
hydrogen in hard magnetic materials 121
desorption characteristics of rare earth (R) hydrides (R = Y, Ce, Pr, Nd, Sm, Gd and Tb) in relation to the HDDR behaviour of R–Fe-based-compounds 128
the hydrogenation–disproportionation–desorption–recombination process of $Nd_2Fe_{14}B$ studied by in-situ neutron diffraction and thermomagnetic measurements 140
HDDR process
further studies of hydrogenation, disproportionation, desorption and recombination processes in a $Nd_5Fe_2B_6$ boride 134
Heat accelerators
characteristics of heat–hydrogen gas energy conversion and hydrogen gas transportation using hydrogen absorbing alloy 677
Heat–hydrogen pressure conversion
characteristics of heat–hydrogen gas energy conversion and hydrogen gas transportation using hydrogen absorbing alloy 677
Heat pump
thermodynamic properties of metal hydrides for a novel heat pump configuration 673
Heat storage
hydride-based cold-start heater for automotive catalyst 686
Heterogeneous alloys
hydrogen diffusion in multi-phase LaNiFe alloys 390
HF treatment
effect of HF pretreatment on H_2 reactivity with $LaNi_5$ and $LaNi_{4.7}Al_{0.3}$ 547
High field magnetization
high field magnetization of metal hydrides under hydrogen pressure 350
High pressure phases
high pressure hydride phases formation in Ti_2Ni- and $MoSi_2$-type intermetallic compounds 41
High-temperature
systematics of the anomalous high-temperature ^{45}Sc spin–lattice relaxation in scandium hydrides and deuterides 441
H in metals
an investigation of hydrogen diffusion in nanocrystalline Pd by neutron spectroscopy 393
H metal systems
an investigation of hydrogen diffusion in nanocrystalline Pd by neutron spectroscopy 393
H_2O
kinetics of water vapour absorption on evaporated iron and titanium films 560
Hot-charging
new activation process for Zr-Ti-Cr-Mn-V-Ni alloy electrodes: The hot-charging treatment 652
Hydride
synthesis of novel compounds by hydrogen combustion 10
nanocrystalline hydrogen storage alloys for rechargeable batteries 87
alloying effect on the electronic structures of hydrogen storage compounds 322
magnetic properties of the $LaNi_5$–H system 336
^{119}Sn Mössbauer study of Mn_3SnH_x 339
an impedance model for electrode processes in metal hydride electrodes 656
hydride-based cold-start heater for automotive catalyst 686
Hydride battery
the state of research and development for applications of metal hydrides in Japan 635
Hydride complex
synthesis and structure determination of complex zinc hydrides. Part 4: Trirubidium and tricaesium tetrahydridozincate(II) hydride, Rb_3ZnH_5 and Cs_3ZnH_5 13
Hydride electrode
fluorination mechanism and its effects on the electrochemical properties of metal hydrides 500
correlation between crystal structure and electrochemical properties of C14 Laves-phase alloys 609
the state of research and development for applications of metal hydrides in Japan 635
Hydride formation
kinetics of hydride formation in massive $LaAl_{0.25}Ni_{4.75}$ samples 556
Hydride phase change
the effect of cycling through the hydride phase on isotherms for fcc Pd-rich alloys 216
Hydride technology
the recent research, development and industrial applications of metal hydrides in the People's Republic of China 629
Hydrides
hydrogenation of fullerenes C_{60} and C_{70} in the presence of hydride-forming metals and intermetallic compounds 25
synthesis and transformations of hydrides under high quasihydrostatic pressures 38
desorption characteristics of rare earth (R) hydrides (R = Y, Ce, Pr, Nd, Sm, Gd and Tb) in relation to the HDDR behaviour of R–Fe-based-compounds 128
further studies of hydrogenation, disproportionation, desorption and recombination processes in a $Nd_5Fe_2B_6$ boride 134
distribution of hydrogen atoms in YPd_3H_x studied by neutron diffraction and inelastic neutron scattering 308
hydrogen absorption–desorption, crystal structure and magnetism in RENiAl intermetallic compounds and their hydrides 343
surface properties of the fluorinated La-incorporated Ti/Zr-based AB_2 laves phase alloys 452
electrochemical performances of ZrM_2 (M = V, Cr, Mn, Ni) Laves phases and the relation to microstructures and thermodynamical properties 564
Hydrides of intermetallics
synthesis of novel compounds by hydrogen combustion 10
Hydriding property
hydrogenation characteristics of $TiFe_{1-x}Pd_x$ ($0.05 \leq x \leq 0.30$) alloys 238
Hydrocarbons
hydride-based cold-start heater for automotive catalyst 686

Hydrogen
hydrogenation of fullerenes C_{60} and C_{70} in the presence of hydride-forming metals and intermetallic compounds 25
metallic superlattices: quasi two-dimensional playground for hydrogen 51
analysis of hydrogen in Nb thin films and Nb/Cu multilayers, using ion beams 66
hydrogen-induced amorphization of C15 Laves $TbFe_2$ compound 106
hydrogen-induced amorphization of YNi_2 enhanced by mechanical grinding 110
structure of hydrogenated amorphous $Ni_{56}Dy_{44}$ 118
hydrogen solubility limits in α- and β-zirconium 162
Ti-based laves phase hydrides with high dissociation pressures 201
calorimetric study of hydrogen interaction with $LaNi_{3.92}Al_{0.98}$ 210
neutron scattering studies of the structure and dynamics of rare-earth hydrides and deuterides 241
vibrational dynamics of hydrogen and deuterium in crystalline Pd_9Si_2 255
hydrogen in aluminum 260
the interaction of oxygen (nitrogen) with hydrogen in Ti, V and Ta 275
hydrogen-induced change of the magnetic coupling in Nb/Fe multilayers 347
investigation of interaction of hydrogen with solute atoms by means of internal friction and diffusion data 364
hydrogen transport parameters for a cobalt based alloy 381
characterising materials for walls of fusion reactors 397
muonium states and dynamics as a model for hydrogen in semiconductors 414
high temperature ^1H spin–spin relaxation in Zr–Ni–Cu–H amorphous alloys 428
nuclear quadrupolar relaxation in metal–hydrogen systems 449
the influence of hydrogen on the growth of yttrium on Ni(001) and Ni(110) 467
hydrogen diffusion in oxides formed on surfaces of zirconium alloys 471
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
XPS and transmission electron microscopy of the multicomponent hydride-forming alloys for electrochemical applications 488
surface phenomena in the process of vanadium hydride formation 496
H_2 dissociative adsorption on palladium hydride and titanium hydride surfaces: Evidence for weakly bound state of hydrogen adatoms 506
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525
gas atomized powders of hydride-forming alloys and their application in rechargeable batteries 594
hydride-based cold-start heater for automotive catalyst 686
Hydrogenation
hydrogen absorption in an icosahedral ZnMgY alloy 90
hydrogen in hard magnetic materials 121
a tubular reactor for continuous hydrogenation of oleic acid under moderate conditions using a thin hydride layer of hydrogen storage alloy $LaNi_{4.8}Cu_{0.2}$ as catalyst 689
Hydrogen absorbing alloy
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
correlation between crystal structure and electrochemical properties of C14 Laves-phase alloys 609
influence of preparation methods of non-stoichiometric hydrogen-absorbing alloys on the performance of nickel–metal hydride secondary batteries 648
characteristics of heat–hydrogen gas energy conversion and hydrogen gas transportation using hydrogen absorbing alloy 677
Hydrogen absorption
characterization and hydriding properties of Mg-graphite composites prepared by mechanical grinding as new hydrogen storage materials 34
about hydrogen insertion in $ThMn_{12}$ type alloys 298
Hydrogen absorption isotherm
hydrogen absorption and desorption isotherms in the solid solution regions of the $LaNi_5$–H system 235
Hydrogen absorption segregation
effects of the materials processing on the hydrogen absorption properties of $MmNi_5$ type alloys 621
Hydrogen adsorption
hydrogen adsorption of metal nickel and hydrogen storage alloy electrodes 515
Hydrogen charging–discharging
electrical resistance change during hydrogen charging and discharging in $Ni_{67-x}Cu_xZr_{33}$ glassy alloys 114
Hydrogen desorption isotherm
hydrogen absorption and desorption isotherms in the solid solution regions of the $LaNi_5$–H system 235
Hydrogen detection
hydrogen detection by prompt gamma-ray activation analysis (PGAA) 156
Hydrogen (Deuterium)-Semiconductor Systems
hopping and tunnelling of H(D) in semiconductors 356
Hydrogen diffusion
hydrogen in nanocrystalline palladium 84
hydrogen-diffusion in $Pd_{1-x}Ag_x$ ($0 \leq x \leq 1$) 378
hydrogen diffusion in multi-phase LaNiFe alloys 390
Hydrogen diffusion in metals
a study of hydrogen diffusion in hexagonal YH_x single crystals ($x \leq 0.10$) by mechanical spectroscopy 386
Hydrogen diffusivity
hydrogen permeability and diffusivity in amorphous Metglas 2826MB under AC excitation 370
Hydrogen embrittlement
alloy development to minimize room temperature hydrogen embrittlement in iron aluminides 148
observation of the β–δ phase transformation in deuterated iodide titanium films by electrical resistance measurements 158
Hydrogen gas transportation
characteristics of heat–hydrogen gas energy conversion and hydrogen gas transportation using hydrogen absorbing alloy 677
Hydrogen isotopes
correlation of mass dependence between heat of transport and effective charge of hydrogen isotopes in V, Nb and Ta 401
Hydrogen location
distribution of hydrogen atoms in YPd_3H_x studied by neutron diffraction and inelastic neutron scattering 308
Hydrogen ordering
synthesis and crystal structure of tetragonal $LnMg_2H_7$ (Ln = La, Ce), two Laves phase hydride derivatives having ordered hydrogen distribution 313

Hydrogen permeability
hydrogen permeability and diffusivity in amorphous Metglas 2826MB under AC excitation 370
Hydrogen peroxide
electrochemical activity enhancement of a $LaNi_{4.7}Al_{0.3}$ electrode treated with an alkaline solution containing H_2O_2 598
Hydrogen potential well
incoherent inelastic neutron scattering from the C-15 Laves phase $ZrTi_2H_{3.6}$ 248
Hydrogen purification
the state of research and development for applications of metal hydrides in Japan 635
Hydrogen solubility
hydrogen absorption and desorption isotherms in the solid solution regions of the $LaNi_5$–H system 235
Hydrogen solution
thermodynamic properties for solution of hydrogen in Pd–Pt–Rh ternary alloys 212
Hydrogen storage
characterization and hydriding properties of Mg-graphite composites prepared by mechanical grinding as new hydrogen storage materials 34
cooperative hydriding properties in a nanostructured Mg_2Ni–H system 80
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
Hydrogen storage alloy
effects of nonmetal addition on hydriding properties for Ti–Mn Laves phase alloys 29
vanadium-based solid solution alloys with three-dimensional network structure for high capacity metal hydride electrodes 583
the state of research and development for applications of metal hydrides in Japan 635
investigation of AB_5 type hydrogen storage alloy corrosion behavior in alkaline electrolyte solutions 660
metal hydride electrodes with lamellar-type network structure 665
Hydrogen storage alloys
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574
hydriding behavior of gas-atomized AB_5 alloys 613
Hydrogen storage intermetallics
the recent research, development and industrial applications of metal hydrides in the People's Republic of China 629
Hydrogen trapping
hydrogen absorption and desorption isotherms in the solid solution regions of the $LaNi_5$–H system 235
Hydrogenising and mechanism of deformation
hydrogen influence on plastic deformation mechanism of β-titanium alloys of Ti–Nb system 144
Hydrogen-vacancy complex
hydrogen in aluminum 260
Hysteresis
hysteresis in metal–hydrogen systems 203
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574

Impedance
an impedance model for electrode processes in metal hydride electrodes 656
Impedance spectroscopy
a new approach to the kinetics of $LaNi_5$–H_2(g) systems based on impedance spectroscopy analysis 542
Incoherent inelastic neutron scattering
incoherent inelastic neutron scattering from the C-15 Laves phase $ZrTi_2H_{3.6}$ 248
Inelastic
interstitial site occupation in α-$LaNi_5$-H studied by deep inelastic neutron scattering 291
Inelastic neutron scattering
the interaction of oxygen (nitrogen) with hydrogen in Ti, V and Ta 275
In situ neutron diffraction
in situ neutron diffraction study of solid gas desorption of non-stoichiometric AB_5 type hydrides 295
Interatomic interaction
investigation of interaction of hydrogen with solute atoms by means of internal friction and diffusion data 364
Inter-grain
hydriding properties of a nano-/amorphous-structured Mg–Ni–H system 94
Intermetallic compound
hydrogen-induced amorphization of C15 Laves $TbFe_2$ compound 106
Intermetallic compounds
hydrogenation of fullerenes C_{60} and C_{70} in the presence of hydride-forming metals and intermetallic compounds 25
distribution of hydrogen atoms in YPd_3H_x studied by neutron diffraction and inelastic neutron scattering 308
Intermetallic hydrides
high pressure hydride phases formation in Ti_2Ni- and $MoSi_2$-type intermetallic compounds 41
Intermetallics
XPS and transmission electron microscopy of the multicomponent hydride-forming alloys for electrochemical applications 488
gas atomized powders of hydride-forming alloys and their application in rechargeable batteries 594
Internal friction
hydrogen influence on plastic deformation mechanism of β-titanium alloys of Ti–Nb system 144
a study of hydrogen diffusion in hexagonal YH_x single crystals ($x \leq 0.10$) by mechanical spectroscopy 386
Interstitial
interstitial site occupation in α-$LaNi_5$-H studied by deep inelastic neutron scattering 291
Intra-grain
hydriding properties of a nano-/amorphous-structured Mg–Ni–H system 94
Iron aluminides
alloy development to minimize room temperature hydrogen embrittlement in iron aluminides 148
Isotherms
Ti-based laves phase hydrides with high dissociation pressures 201
the effect of cycling through the hydride phase on isotherms for fcc Pd-rich alloys 216
pressure–composition measurements and microstructural analysis of the Laves phases $Zr(Cr_{0.5}Mo_{0.2}M_{0.3})_2$ with M = Fe, Co, Ni 221

Kinetics
nanocrystalline metal hydrides 70

hydrogen absorption of $LaNi_5$ powders precovered with O_2, CO, H_2S, CO_2 or N_2 511
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525
kinetics and mechanisms of metal hydrides formation—a review 529
a new approach to the kinetics of $LaNi_5$–H_2(g) systems based on impedance spectroscopy analysis 542
experimental analysis and modelling of the hydriding kinetics of Ni-doped and pure Mg 550
kinetics of hydride formation in massive $LaAl_{0.25}Ni_{4.75}$ samples 556
an impedance model for electrode processes in metal hydride electrodes 656
KOH
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525

$LaAl_xNi_{5-x}$
kinetics of hydride formation in massive $LaAl_{0.25}Ni_{4.75}$ samples 556
La-enriched secondary phase
surface properties of the fluorinated La-incorporated Ti/Zr-based AB_2 laves phase alloys 452
$LaNi_5$
split plateaux in the $LaNi_5$–H system and the effect of Sn substitution on splitting 226
hydrogen absorption and desorption isotherms in the solid solution regions of the $LaNi_5$–H system 235
alloying effect on the electronic structures of hydrogen storage compounds 322
hydrogen absorption of $LaNi_5$ powders precovered with O_2, CO, H_2S, CO_2 or N_2 511
a new approach to the kinetics of $LaNi_5$–H_2(g) systems based on impedance spectroscopy analysis 542
effect of HF pretreatment on H_2 reactivity with $LaNi_5$ and $LaNi_{4.7}Al_{0.3}$ 547
hydriding behavior of gas-atomized AB_5 alloys 613
$LaNi_{4.7}Al_{0.3}$
effect of HF pretreatment on H_2 reactivity with $LaNi_5$ and $LaNi_{4.7}Al_{0.3}$ 547
electrochemical activity enhancement of a $LaNi_{4.7}Al_{0.3}$ electrode treated with an alkaline solution containing H_2O_2 598
$LaNi_4CuD_y$
in situ neutron diffraction study of solid gas desorption of non-stoichiometric AB_5 type hydrides 295
La–Ni–Fe
hydrogen diffusion in multi-phase LaNiFe alloys 390
$LaNi_{5-x}Ge_xH$ system
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574
$LaNi_{5-x}Sn_x$
split plateaux in the $LaNi_5$–H system and the effect of Sn substitution on splitting 226
Lanthanum
neutron scattering studies of the structure and dynamics of rare-earth hydrides and deuterides 241
Lanthanum trihydride
hydrogen hopping rates and the order–disorder transitions in sub-stoichiometric lanthanum trihydride 445
Lattice defects
reorientation of the Ce–D pairs in a $Pd_{95}Ce_5D_n$ alloy 360
Lattice expansion
metallic superlattices: quasi two-dimensional playground for hydrogen 51
Laves phase
effects of nonmetal addition on hydriding properties for Ti–Mn Laves phase alloys 29
hydrogen-induced amorphization of C15 Laves $TbFe_2$ compound 106
hydrogen-induced amorphization of YNi_2 enhanced by mechanical grinding 110
pressure–composition measurements and microstructural analysis of the Laves phases $Zr(Cr_{0.5}Mo_{0.2}M_{0.3})_2$ with M = Fe, Co, Ni 221
hydrogenation and phase structure of Ti–Fe–V alloys 232
neutron diffraction study of atomic bonding properties in the hydrogen-absorbing $Zr(Al_xFe_{1-x})_2$ system 265
synthesis and crystal structure of tetragonal $LnMg_2H_7$ (Ln = La, Ce), two Laves phase hydride derivatives having ordered hydrogen distribution 313
microstructural characterisation of surface layers of ZrM_2 powders (Laves phases) obtained by various corrosion treatments 492
structural- and hydriding-properties of the $Zr(V_{0.25}Ni_{0.75})_\alpha$ ($1 \leq \alpha \leq 4$) alloy system 587
correlation between crystal structure and electrochemical properties of C14 Laves-phase alloys 609
Laves phases
Ti-based laves phase hydrides with high dissociation pressures 201
structural and magnetic study of new YFe_2D_x compounds ($0 < x \leq 3.5$) 272
neutron diffraction study of deuterium ordering in C15 type TaV_2D_x ($x > 1$) in the temperature range of 1.5–295 K 282
LiOH
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525
Loading ratio
material characteristics and behaviour of highly deuterium loaded palladium by electrolysis 185
experimental study of electrochemical deuterium loading of Pd cathodes in the $LiOD/D_2O$ system 617
Localized hydrogen vibrations
incoherent inelastic neutron scattering from the C-15 Laves phase $ZrTi_2H_{3.6}$ 248
Localized modes
neutron spectroscopy of localized modes in $CeD_{2-x}H_y$ 252
Low Co content
development of AB_5 type hydrogen storage alloys with low Co content for rechargeable Ni–MH batteries with respect to electric vehicle applications 570

Magnesium
characterization and hydriding properties of Mg-graphite composites prepared by mechanical grinding as new hydrogen storage materials 34
Magnesium hydride
experimental analysis and modelling of the hydriding kinetics of Ni-doped and pure Mg 550
Magnesium–nickel–hydrogen
hydriding properties of a nano-/amorphous-structured Mg–Ni–H system 94
Magnesium particle
characteristics of heat–hydrogen gas energy conversion and hydrogen gas transportation using hydrogen absorbing alloy 677

Magnetic coupling
hydrogen-induced change of the magnetic coupling in Nb/Fe multilayers 347
Magnetic field
thermodynamic theory of magnetic field effects on chemical equilibria and applications to metal–hydrogen systems 191
Magnetic properties
high field magnetization of metal hydrides under hydrogen pressure 350
Magnetic resonance
high temperature ^{1}H spin–spin relaxation in Zr–Ni–Cu–H amorphous alloys 428
Magnetic structure
about hydrogen insertion in $ThMn_{12}$ type alloys 298
Magnetic transition
^{119}Sn Mössbauer study of Mn_3SnH_x 339
Magnetism
structural and magnetic study of new YFe_2D_x compounds ($0 < x \leq 3.5$) 272
magnetic properties of the $LaNi_5$–H system 336
hydrogen absorption–desorption, crystal structure and magnetism in RENiAl intermetallic compounds and their hydrides 343
Magnetoresistance
hydrogen-induced change of the magnetic coupling in Nb/Fe multilayers 347
Magnetostriction
hydrogen permeability and diffusivity in amorphous Metglas 2826MB under AC excitation 370
Magnets
hydrogen in hard magnetic materials 121
Mass effect
correlation of mass dependence between heat of transport and effective charge of hydrogen isotopes in V, Nb and Ta 401
Mean-field theory
the phase diagrams of β-RH_{2+x} systems (R = La, Ce, Tb). Results of mean-field calculations 171
Mean square distance
hydrogen-diffusion in $Pd_{1-x}Ag_x$ ($0 \leq x \leq 1$) 378
Mechanical alloying
electrode characteristics of metal hydride electrodes prepared by mechanical alloying 605
Mechanical grinding
characterization and hydriding properties of Mg-graphite composites prepared by mechanical grinding as new hydrogen storage materials 34
Mechanical relaxation
reorientation of the Ce–D pairs in a $Pd_{95}Ce_5D_n$ alloy 360
Mechanical spectroscopy
a study of hydrogen diffusion in hexagonal YH_x single crystals ($x \leq 0.10$) by mechanical spectroscopy 386
Metal
nuclear quadrupolar relaxation in metal–hydrogen systems 449
Metal hydride
hydrogenation characteristics of $TiFe_{1-x}Pd_x$ ($0.05 \leq x \leq 0.30$) alloys 238
neutron powder diffraction investigations of pure and deuterated $Ti_3PO_{0.58}$ 279
interstitial site occupation in α-$LaNi_5$-H studied by deep inelastic neutron scattering 291
study of the system $Zr_{1-x}Ti_x(Cr_{0.5}M_{0.4}V_{0.1})_2 - H_2$ ($0 \leq x \leq 0.2$, M = Fe, Co, Ni) 302
electrode characteristics of metal hydride electrodes prepared by mechanical alloying 605
the state of research and development for applications of metal hydrides in Japan 635
a tubular reactor for continuous hydrogenation of oleic acid under moderate conditions using a thin hydride layer of hydrogen storage alloy $LaNi_{4.8}Cu_{0.2}$ as catalyst 689
Metal hydride applications
the recent research, development and industrial applications of metal hydrides in the People's Republic of China 629
Metal-hydride batteries
the influence of Co and various additives on the performance of $MmNi_{4.3-x}Mn_{0.33}Al_{0.4}Co_x$ hydrogen storage alloys and Ni/MH prismatic sealed cells 642
Metal hydride electrode
hydrogen adsorption of metal nickel and hydrogen storage alloy electrodes 515
vanadium-based solid solution alloys with three-dimensional network structure for high capacity metal hydride electrodes 583
Metal hydride electrodes
function of cobalt in AB_5H_x electrodes 579
Metal hydrides
localized motion of hydrogen in C15-type TaV_2: nuclear magnetic resonance and neutron scattering study 432
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574
structural- and hydriding-properties of the $Zr(V_{0.25}Ni_{0.75})_\alpha$ ($1 \leq \alpha \leq 4$) alloy system 587
hydriding behavior of gas-atomized AB_5 alloys 613
relationship between composition, volume expansion and cyclic stability of AB_5-type metalhydride electrodes 626
the recent research, development and industrial applications of metal hydrides in the People's Republic of China 629
thermodynamic properties of metal hydrides for a novel heat pump configuration 673
Metal hydrogen system
thermodynamic theory of magnetic field effects on chemical equilibria and applications to metal–hydrogen systems 191
structure and microdomain structure of ordered niobium hydrides and deuterides by means of neutron scattering 258
Metal–hydrogen systems
hysteresis in metal–hydrogen systems 203
a study of hydrogen diffusion in hexagonal YH_x single crystals ($x \leq 0.10$) by mechanical spectroscopy 386
measuring distributions of jump rates in disordered metal–hydrogen systems by nuclear magnetic relaxation 425
Metal matrix hydride compacts
preparation and properties of metal matrix hydride compacts via the rotary forging compaction route 698
Metal tritide
electron emission at the surface of metal tritide films 62
Metallic hydrides
preparation and properties of metal matrix hydride compacts via the rotary forging compaction route 698
μ^+ in metals
modelling of hydrogen behavior in metals by muons 406
Metastable
nanocrystalline metal hydrides 70
Mg_2Ni
alloying effect on the electronic structures of hydrogen storage compounds 322
Mg_2Ni–H
cooperative hydriding properties in a nanostructured Mg_2Ni–H system 80

MH batteries
pressure–composition measurements and microstructural analysis of the Laves phases $Zr(Cr_{0.5}Mo_{0.2}M_{0.3})_2$ with M = Fe, Co, Ni 221
Microstructure
material characteristics and behaviour of highly deuterium loaded palladium by electrolysis 185
microstructural characterisation of surface layers of ZrM_2 powders (Laves phases) obtained by various corrosion treatments 492
vanadium-based solid solution alloys with three-dimensional network structure for high capacity metal hydride electrodes 583
preparation and electrochemical properties of unidirectionally solidified $Ml(NiCoMnTi)_5$ alloys 590
Microstructure control
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
Mischmetal based alloy
preparation and electrochemical properties of unidirectionally solidified $Ml(NiCoMnTi)_5$ alloys 590
Modelling
an impedance model for electrode processes in metal hydride electrodes 656
Molybdenum
characterising materials for walls of fusion reactors 397
Monte Carlo
electron emission at the surface of metal tritide films 62
Monte Carlo calculations
measuring distributions of jump rates in disordered metal–hydrogen systems by nuclear magnetic relaxation 425
Mössbauer
structural and magnetic study of new YFe_2D_x compounds ($0 < x \leq 3.5$) 272
Mössbauer spectroscopy
^{119}Sn Mössbauer study of Mn_3SnH_x 339
Mössbauer experiments with ^{57}Fe and ^{57}Co in palladium hydride: Diffusional relaxation and high hydrogen concentrations 353
Multilayers
hydrogen-induced change of the magnetic coupling in Nb/Fe multilayers 347
Muonium
muonium states and dynamics as a model for hydrogen in semiconductors 414
Muon spectroscopy
trapped muon in heavily dislocated palladium 420

Nanocrystal
nanocrystalline metal hydrides 70
Nanocrystalline
nanocrystalline hydrogen storage alloys for rechargeable batteries 87
hydrogen-induced resistivity increase in amorphous and metastable crystalline (Fe,Co,Ni)–Zr ribbons 98
Nanocrystalline palladium
hydrogen in nanocrystalline palladium 84
Nanocrystalline Pd
an investigation of hydrogen diffusion in nanocrystalline Pd by neutron spectroscopy 393
Nano structure
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
cooperative hydriding properties in a nanostructured Mg_2Ni–H system 80
hydriding properties of a nano-/amorphous-structured Mg–Ni–H system 94
NaOH
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525
Nb/Cu multilayer
analysis of hydrogen in Nb thin films and Nb/Cu multilayers, using ion beams 66
Nb films
thickness dependence of the hydrogen solubility in epitaxial Nb(110) films grown on Al_2O_3(11.0) substrates 58
Nd–Fe–B
the hydrogenation–disproportionation–desorption–recombination process of $Nd_2Fe_{14}B$ studied by in-situ neutron diffraction and thermomagnetic measurements 140
Nd–Fe(or Co)–B system
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
Neodymium
further studies of hydrogenation, disproportionation, desorption and recombination processes in a $Nd_5Fe_2B_6$ boride 134
Neutron diffraction
orthorhombic $Ba_6Mg_7H_{26}$: a new fluoride-related ternary alkaline earth hydride 17
structure of hydrogenated amorphous $Ni_{56}Dy_{44}$ 118
the hydrogenation–disproportionation–desorption–recombination process of $Nd_2Fe_{14}B$ studied by in-situ neutron diffraction and thermomagnetic measurements 140
deuterium absorption in $Pd_{0.9}Y_{0.1}$ alloy 175
structure and microdomain structure of ordered niobium hydrides and deuterides by means of neutron scattering 258
neutron powder diffraction investigations of pure and deuterated $Ti_3PO_{0.58}$ 279
about hydrogen insertion in $ThMn_{12}$ type alloys 298
study of the system $Zr_{1-x}Ti_x(Cr_{0.5}M_{0.4}V_{0.1})_2 - H_2$ ($0 \leq x \leq 0.2$, M = Fe, Co, Ni) 302
distribution of hydrogen atoms in YPd_3H_x studied by neutron diffraction and inelastic neutron scattering 308
synthesis and crystal structure of tetragonal $LnMg_2H_7$ (Ln = La, Ce), two Laves phase hydride derivatives having ordered hydrogen distribution 313
neutron diffraction study of $HoFe_{11}TiD_x$ deuterides 318
Neutron powder diffraction
synthesis and structure determination of complex zinc hydrides. Part 4: Trirubidium and tricaesium tetrahydridozincate(II) hydride, Rb_3ZnH_5 and Cs_3ZnH_5 13
neutron diffraction study of deuterium ordering in C15 type TaV_2D_x ($x > 1$) in the temperature range of 1.5–295 K 282
Neutron reflectometry
hydrogen-induced change of the magnetic coupling in Nb/Fe multilayers 347
Neutron scattering
neutron scattering studies of the structure and dynamics of rare-earth hydrides and deuterides 241
neutron spectroscopy of localized modes in $CeD_{2-x}H_y$ 252
vibrational dynamics of hydrogen and deuterium in crystalline Pd_9Si_2 255
interstitial site occupation in α-$LaNi_5$-H studied by deep inelastic neutron scattering 291

Neutron vibrational spectroscopy
structure and microdomain structure of ordered niobium hydrides and deuterides by means of neutron scattering 258
Nickel
the influence of hydrogen on the growth of yttrium on Ni(001) and Ni(110) 467
Nickel-hydride batteries
electrochemical performances of ZrM_2 (M = V, Cr, Mn, Ni) Laves phases and the relation to microstructures and thermodynamical properties 564
Nickel–metal hydride battery
influence of preparation methods of non-stoichiometric hydrogen-absorbing alloys on the performance of nickel–metal hydride secondary batteries 648
metal hydride electrodes with lamellar-type network structure 665
Ni-MH
the hydrogenation characteristics of Ti-Zr-V-Mn-Ni C14 type Laves phase alloys for metal hydride electrodes 601
Ni-MH battery alloys
hydriding behavior of gas-atomized AB_5 alloys 613
Niobium
structure and microdomain structure of ordered niobium hydrides and deuterides by means of neutron scattering 258
Nonmetal addition
effects of nonmetal addition on hydriding properties for Ti–Mn Laves phase alloys 29
Nuclear magnetic relaxation
muon spin relaxation in niobium-hydrogen 423
measuring distributions of jump rates in disordered metal–hydrogen systems by nuclear magnetic relaxation 425
Nuclear magnetic resonance
systematics of the anomalous high-temperature ^{45}Sc spin–lattice relaxation in scandium hydrides and deuterides 441
hydrogen hopping rates and the order–disorder transitions in sub-stoichiometric lanthanum trihydride 445
Nuclear quadrupole relaxation
nuclear quadrupolar relaxation in metal–hydrogen systems 449
Nucleation
kinetics and mechanisms of metal hydrides formation—a review 529

O and N effects on solid solutions
the interaction of oxygen (nitrogen) with hydrogen in Ti, V and Ta 275
Oleic acid
a tubular reactor for continuous hydrogenation of oleic acid under moderate conditions using a thin hydride layer of hydrogen storage alloy $LaNi_{4.8}Cu_{0.2}$ as catalyst 689
Optical properties
yttrium and lanthanum hydride films with switchable optical properties 44
Order–disorder transition
hydrogen hopping rates and the order–disorder transitions in sub-stoichiometric lanthanum trihydride 445
Order–disorder transitions
neutron diffraction study of deuterium ordering in C15 type TaV_2D_x ($x > 1$) in the temperature range of 1.5–295 K 282

Palladium
deformations induced by high loading ratios in palladium–deuterium compounds 181
material characteristics and behaviour of highly deuterium loaded palladium by electrolysis 185
the decomposition of electrochemically loaded palladium hydride: a thermal analysis study 207
hydrogenation characteristics of $TiFe_{1-x}Pd_x$ ($0.05 \leq x \leq 0.30$) alloys 238
vibrational dynamics of hydrogen and deuterium in crystalline Pd_9Si_2 255
trapped muon in heavily dislocated palladium 420
experimental study of electrochemical deuterium loading of Pd cathodes in the $LiOD/D_2O$ system 617
Palladium hydride
H_2 dissociative adsorption on palladium hydride and titanium hydride surfaces: Evidence for weakly bound state of hydrogen adatoms 506
Palladium hydrides
internal pressure effect in the series of perovskite structure hydrides: $APdH_3$ (A = Sr,Eu,Yb) 330
Mössbauer experiments with ^{57}Fe and ^{57}Co in palladium hydride: Diffusional relaxation and high hydrogen concentrations 353
Palladium–silver–hydrogen
hydrogen-diffusion in $Pd_{1-x}Ag_x$ ($0 \leq x \leq 1$) 378
Passivation
muonium states and dynamics as a model for hydrogen in semiconductors 414
Passivity
alloy development to minimize room temperature hydrogen embrittlement in iron aluminides 148
P–C isotherms
hydrogenation and phase structure of Ti–Fe–V alloys 232
PCT diagram
effects of nonmetal addition on hydriding properties for Ti–Mn Laves phase alloys 29
Pd–Ce alloys
reorientation of the Ce–D pairs in a $Pd_{95}Ce_5D_n$ alloy 360
Pd–Pt–Rh ternary alloys
thermodynamic properties for solution of hydrogen in Pd–Pt–Rh ternary alloys 212
Pd-rich alloys
the effect of cycling through the hydride phase on isotherms for fcc Pd-rich alloys 216
Perovskite structure
internal pressure effect in the series of perovskite structure hydrides: $APdH_3$ (A = Sr,Eu,Yb) 330
^{119}Sn Mössbauer study of Mn_3SnH_x 339
PFG-NMR
nuclear magnetic resonance studies of hydrogen diffusion in the layer-structured system $ZrClH_x$ 435
Phase diagram
deuterium absorption in $Pd_{0.9}Y_{0.1}$ alloy 175
Phase diagrams
the phase diagrams of β-RH_{2+x} systems (R = La, Ce, Tb). Results of mean-field calculations 171
Phase formation
metallic superlattices: quasi two-dimensional playground for hydrogen 51
Phase transformations
observation of the β–δ phase transformation in deuterated iodide titanium films by electrical resistance measurements 158
Phase transitions
synthesis and transformations of hydrides under high quasihydrostatic pressures 38

Platinum
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
Platinum hydrides
electronic structure investigation of the A_2PtH_4 hydrides (A = Na, K) containing $[PtH_4]$ complexes 326
Point defects
hydrogen and oxygen motion in yttrium by anelastic relaxation measurements 367
Point defects interactions
hopping rates of H(D) bound to heavy interstitials in Ta as investigated by mechanical spectroscopy at MHz frequencies 374
Poisoning
hydrogen absorption of $LaNi_5$ powders precovered with O_2, CO, H_2S, CO_2 or N_2 511
Positron annihilation
analysis of FeTi hydride alloys by thermal analysis, small angle neutron scattering and positron annihilation 195
Powder X-ray diffraction
powder X-ray diffraction under a high-pressure hydrogen atmosphere for Zr–Cr based Laves phase alloys 268
Precursor state
surface phenomena in the process of vanadium hydride formation 496
Preferential sputtering
ion bombardment induced segregation effects in VD_x studied by SIMS and SNMS 459
Pressure composition isotherms
Ti-doped alkali metal aluminium hydrides as potential novel reversible hydrogen storage materials 1
Pressure–composition–temperature isotherm
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574
Pressure–temperature swing process
a pressure–temperature swing process for the methanation of carbon oxides using fluorinated hydriding alloys 668
Prompt gamma-ray activation analysis
hydrogen detection by prompt gamma-ray activation analysis (PGAA) 156
Pulsed electrodeposition
hydrogen in nanocrystalline palladium 84

Quartz-crystal microbalance
kinetics of water vapour absorption on evaporated iron and titanium films 560
Quasicrystal
hydrogen absorption in an icosahedral ZnMgY alloy 90
Quasielastic neutron scattering
localized motion of hydrogen in C15-type TaV_2: nuclear magnetic resonance and neutron scattering study 432
Quasihydrostatic pressure
synthesis and transformations of hydrides under high quasihydrostatic pressures 38

Radial distribution function
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
Rapid quenching
influence of preparation methods of non-stoichiometric hydrogen-absorbing alloys on the performance of nickel–metal hydride secondary batteries 648
Rare earth
effect of alkaline pretreatment on the initial activation of $LaNi_5$ and $LaNi_{2.5}Co_{2.5}$ in the H_2 gas and electrochemical reactions 525
Rare earth hydrides
the phase diagrams of β-RH_{2+x} systems (R = La, Ce, Tb). Results of mean-field calculations 171
Rare earth metals
hydrogenation of fullerenes C_{60} and C_{70} in the presence of hydride-forming metals and intermetallic compounds 25
desorption characteristics of rare earth (R) hydrides (R = Y, Ce, Pr, Nd, Sm, Gd and Tb) in relation to the HDDR behaviour of R–Fe-based-compounds 128
hydrogen absorption–desorption, crystal structure and magnetism in RENiAl intermetallic compounds and their hydrides 343
Rare-earth trihydride films
yttrium and lanthanum hydride films with switchable optical properties 44
Rate capability
new activation process for Zr-Ti-Cr-Mn-V-Ni alloy electrodes: The hot-charging treatment 652
Reaction rate
kinetics and mechanisms of metal hydrides formation—a review 529
Reactive mechanical grinding
hydrogen-induced amorphization of YNi_2 enhanced by mechanical grinding 110
Reactivity
effect of HF pretreatment on H_2 reactivity with $LaNi_5$ and $LaNi_{4.7}Al_{0.3}$ 547
Relaxation
high temperature ^1H spin–spin relaxation in Zr–Ni–Cu–H amorphous alloys 428
Resistance
electrical resistance change during hydrogen charging and discharging in $Ni_{67-x}Cu_xZr_{33}$ glassy alloys 114
Resistance measurement
experimental study of electrochemical deuterium loading of Pd cathodes in the $LiOD/D_2O$ system 617
Resistivity
the effect of hydrogen uptake on the Hall resistivity and the electrical resistivity of gadolinium films 333
Resistivity increase
hydrogen-induced resistivity increase in amorphous and metastable crystalline (Fe,Co,Ni)–Zr ribbons 98
Reversible hydrogen storage materials
Ti-doped alkali metal aluminium hydrides as potential novel reversible hydrogen storage materials 1
Reversible reaction
hydrogen absorption in an icosahedral ZnMgY alloy 90
R–Fe compounds
high field magnetization of metal hydrides under hydrogen pressure 350
Rhodium
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
Rotary forging
preparation and properties of metal matrix hydride compacts via the rotary forging compaction route 698

Rotating frame relaxation diffusion
muon spin relaxation in niobium-hydrogen 423

Scandium hydrides (deuterides)
systematics of the anomalous high-temperature ^{45}Sc spin–lattice relaxation in scandium hydrides and deuterides 441
Secondary cell
investigation of AB_5 type hydrogen storage alloy corrosion behavior in alkaline electrolyte solutions 660
Secondary phases
electrochemical performances of ZrM_2 (M = V, Cr, Mn, Ni) Laves phases and the relation to microstructures and thermodynamical properties 564
Segregation
ion bombardment induced segregation effects in VD_x studied by SIMS and SNMS 459
Self-stress
deformations induced by high loading ratios in palladium–deuterium compounds 181
Semiconductors
muonium states and dynamics as a model for hydrogen in semiconductors 414
SHS
synthesis of novel compounds by hydrogen combustion 10
Silicon
vibrational dynamics of hydrogen and deuterium in crystalline Pd_9Si_2 255
SIMS
ion bombardment induced segregation effects in VD_x studied by SIMS and SNMS 459
hydrogen (deuterium) bonding properties in ZrV_2D_x studied by SIMS and SNMS 463
Site blocking
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
Small angle neutron scattering
analysis of FeTi hydride alloys by thermal analysis, small angle neutron scattering and positron annihilation 195
Small angle scattering
hydrogen in aluminum 260
SNMS
ion bombardment induced segregation effects in VD_x studied by SIMS and SNMS 459
hydrogen (deuterium) bonding properties in ZrV_2D_x studied by SIMS and SNMS 463
Solubility
hydrogen solubility limits in α- and β-zirconium 162
solubility of hydrogen and deuterium in bcc uranium–titanium alloys 167
hydrogen transport parameters for a cobalt based alloy 381
Spin-lattice relaxation
nuclear magnetic resonance studies of hydrogen diffusion in the layer-structured system $ZrClH_x$ 435
Spinodal decomposition
hydrogen absorption and modulated structure in Ti–V–Mn alloys 21
Split plateau
split plateaux in the $LaNi_5$–H system and the effect of Sn substitution on splitting 226
Steel
hydrogen in the martensitic DIN 1.4914: a review 152
Stoichiometry
influence of preparation methods of non-stoichiometric hydrogen-absorbing alloys on the performance of nickel–metal hydride secondary batteries 648
Strain
metallic superlattices: quasi two-dimensional playground for hydrogen 51
nanocrystalline metal hydrides 70
influence of expansion of metal hydride during hydriding–dehydriding cycles 682
Structure
structure of hydrogenated amorphous $Ni_{56}Dy_{44}$ 118
Structure data
the hydride fluoride crystal structure database, HFD 286
Structure-property-processing correlation
alloy development to minimize room temperature hydrogen embrittlement in iron aluminides 148
Sulfur
hydrogen adsorption on Pt and Rh electrodes and blocking of adsorption sites by chemisorbed sulfur 481
Superlattices
metallic superlattices: quasi two-dimensional playground for hydrogen 51
Surface and interface
H_2 dissociative adsorption on palladium hydride and titanium hydride surfaces: Evidence for weakly bound state of hydrogen adatoms 506
Surface and volume activation
electrical resistance change during hydrogen charging and discharging in $Ni_{67-x}Cu_xZr_{33}$ glassy alloys 114
Surface catalysis
surface properties of the fluorinated La-incorporated Ti/Zr-based AB_2 laves phase alloys 452
Surface phenomena
surface phenomena in the process of vanadium hydride formation 496
Surface treatment
electrochemical activity enhancement of a $LaNi_{4.7}Al_{0.3}$ electrode treated with an alkaline solution containing H_2O_2 598
Switchable metal-hydride mirrors
yttrium and lanthanum hydride films with switchable optical properties 44

Ternary zinc hydrides
synthesis and structure determination of complex zinc hydrides. Part 4: Trirubidium and tricaesium tetrahydridozincate(II) hydride, Rb_3ZnH_5 and Cs_3ZnH_5 13
Thermal
hydrogen absorbing and desorbing properties of Nd–Fe–B and Nd–Co–B amorphous alloys 101
Thermal analysis
analysis of FeTi hydride alloys by thermal analysis, small angle neutron scattering and positron annihilation 195
Thermal desorption
the decomposition of electrochemically loaded palladium hydride: a thermal analysis study 207
Thermal treatment
effects of the materials processing on the hydrogen absorption properties of $MmNi_5$ type alloys 621

Thermodynamic properties
thermodynamic properties of metal hydrides for a novel heat pump configuration 673
Thermodynamics
thermodynamic properties for solution of hydrogen in Pd–Pt–Rh ternary alloys 212
gas-phase H_2 absorption and microstructural properties of $LaNi_{5-x}Ge_x$ alloys 574
Thermomigration
correlation of mass dependence between heat of transport and effective charge of hydrogen isotopes in V, Nb and Ta 401
Thin films
thickness dependence of the hydrogen solubility in epitaxial Nb(110) films grown on Al_2O_3(11.0) substrates 58
H_2 dissociative adsorption on palladium hydride and titanium hydride surfaces: Evidence for weakly bound state of hydrogen adatoms 506
Ti
kinetics of water vapour absorption on evaporated iron and titanium films 560
TiFe
alloying effect on the electronic structures of hydrogen storage compounds 322
$TiFe_2$
hydrogenation and phase structure of Ti–Fe–V alloys 232
TiFe-based alloy
hydrogenation characteristics of $TiFe_{1-x}Pd_x$ ($0.05 \leq x \leq 0.30$) alloys 238
Ti–Fe–V alloy
hydrogenation and phase structure of Ti–Fe–V alloys 232
Ti–Mn alloy
effects of nonmetal addition on hydriding properties for Ti–Mn Laves phase alloys 29
Ti_3PO_{1-x}
neutron powder diffraction investigations of pure and deuterated $Ti_3PO_{0.58}$ 279
Titanium carbide
characterising materials for walls of fusion reactors 397
Titanium catalysts
Ti-doped alkali metal aluminium hydrides as potential novel reversible hydrogen storage materials 1
Titanium hydride
observation of the β–δ phase transformation in deuterated iodide titanium films by electrical resistance measurements 158
H_2 dissociative adsorption on palladium hydride and titanium hydride surfaces: Evidence for weakly bound state of hydrogen adatoms 506
Titanium oxide
the hydrogenation characteristics of Ti-Zr-V-Mn-Ni C14 type Laves phase alloys for metal hydride electrodes 601
Transition metal deuterides
neutron diffraction study of deuterium ordering in C15 type TaV_2D_x ($x > 1$) in the temperature range of 1.5–295 K 282
Transition-metal halide hydride
nuclear magnetic resonance studies of hydrogen diffusion in the layer-structured system $ZrClH_x$ 435
Transition metals
the interaction of oxygen (nitrogen) with hydrogen in Ti, V and Ta 275
Trapping
characterising materials for walls of fusion reactors 397
Tritium
electron emission at the surface of metal tritide films 62
Tubular reactor
a tubular reactor for continuous hydrogenation of oleic acid under moderate conditions using a thin hydride layer of hydrogen storage alloy $LaNi_{4.8}Cu_{0.2}$ as catalyst 689
Two-dimensional diffusion
nuclear magnetic resonance studies of hydrogen diffusion in the layer-structured system $ZrClH_x$ 435

Ultrasonic attenuation
hopping rates of H(D) bound to heavy interstitials in Ta as investigated by mechanical spectroscopy at MHz frequencies 374
Unidirectional solidification
preparation and electrochemical properties of unidirectionally solidified $Ml(NiCoMnTi)_5$ alloys 590
Uranium–titanium alloys
solubility of hydrogen and deuterium in bcc uranium–titanium alloys 167

Vacancies
hydrogen in aluminum 260
Vacancy–interstitial clusters
systematics of the anomalous high-temperature ^{45}Sc spin–lattice relaxation in scandium hydrides and deuterides 441
Vanadium
vanadium-based solid solution alloys with three-dimensional network structure for high capacity metal hydride electrodes 583
Vanadium–deuterium
ion bombardment induced segregation effects in VD_x studied by SIMS and SNMS 459
Vanadium hydride
surface phenomena in the process of vanadium hydride formation 496
Vibrations
vibrational dynamics of hydrogen and deuterium in crystalline Pd_9Si_2 255
Volume expansion
relationship between composition, volume expansion and cyclic stability of AB_5-type metalhydride electrodes 626

X-ray and neutron diffraction
structural and magnetic study of new YFe_2D_x compounds ($0 < x \leq 3.5$) 272
X-ray diffraction
structure of hydrogenated amorphous $Ni_{56}Dy_{44}$ 118
X-ray scattering isotherms
thickness dependence of the hydrogen solubility in epitaxial Nb(110) films grown on Al_2O_3(11.0) substrates 58

Yttrium
neutron scattering studies of the structure and dynamics of rare-earth hydrides and deuterides 241
the influence of hydrogen on the growth of yttrium on Ni(001) and Ni(110) 467
Yttrium-nickel
hydrogen-induced amorphization of YNi_2 enhanced by mechanical grinding 110

Zener relaxation
a study of hydrogen diffusion in hexagonal YH_x single crystals ($x \leq 0.10$) by mechanical spectroscopy 386
Zinc–magnesium–yttrium
hydrogen absorption in an icosahedral ZnMgY alloy 90
α-Zirconium
hydrogen solubility limits in α- and β-zirconium 162
β-Zirconium
hydrogen solubility limits in α- and β-zirconium 162
Zirconium alloys
pressure–composition measurements and microstructural analysis of the Laves phases $Zr(Cr_{0.5}Mo_{0.2}M_{0.3})_2$ with M = Fe, Co, Ni 221
hydrogen diffusion in oxides formed on surfaces of zirconium alloys 471
Zirconium C14 Laves phase
study of the system $Zr_{1-x}Ti_x(Cr_{0.5}M_{0.4}V_{0.1})_2 - H_2$ ($0 \leq x \leq 0.2$, M = Fe, Co, Ni) 302
Zirconium–vanadium–deuterium
hydrogen (deuterium) bonding properties in ZrV_2D_x studied by SIMS and SNMS 463
Zr-based Laves phases
electrochemical performances of ZrM_2 (M = V, Cr, Mn, Ni) Laves phases and the relation to microstructures and thermodynamical properties 564
Zr–Cr based Laves phase
powder X-ray diffraction under a high-pressure hydrogen atmosphere for Zr–Cr based Laves phase alloys 268
$ZrMn_2$
alloying effect on the electronic structures of hydrogen storage compounds 322
Zr–Nb oxides
hydrogen diffusion in oxides formed on surfaces of zirconium alloys 471
Zr–Ni–Cu–H
high temperature ^1H spin–spin relaxation in Zr–Ni–Cu–H amorphous alloys 428
$ZrTi_2H_x$
incoherent inelastic neutron scattering from the C-15 Laves phase $ZrTi_2H_{3.6}$ 248
